

Press release

TRICERA energy successfully recertified according to ISO 9001 and ISO 45001

(Dresden, March 13, 2025) TRICERA energy has been re-certified to ISO standards 9001 and 45001. The Dresden-based company operates successfully as a general contractor (EPC) and system integrator for large-scale battery storage systems consisting of second- and first-life battery modules.

The aim of ISO 45001 is to effectively integrate occupational health and safety into the company's day-to-day operations. These aspects are particularly important in day-to-day work with battery storage systems. In addition, the standard also considers the awarding of contracts to subcontractors and the outsourcing of services to external service providers beyond company boundaries.

ISO 9001 is the most widely used quality management standard in the world. It defines the basic requirements for a QM system that must be met in order to ensure both customer expectations and the quality requirements for products and services. Certification by ALL-CERT covers the development, manufacture, installation and maintenance of energy storage systems.

TRICERA energy was successfully certified in both standards in 2022, one year after the company was founded. We are delighted to have successfully undergone re-certification this year. TRICERA energy GmbH fully complies with ISO 45001 and 9001.

We are very proud of this result and would like to take this opportunity to thank our employees and partners, with whom we are driving forward the energy transition together.

Background TRICERA energy

To a new era - that is the vision of TRICERA energy GmbH. The sustainable company based in Freiberg and Dresden specializes in the development, construction and operation of medium (<500kWh) to large (>2MWh) battery storage systems, thus enabling an optimized, demand-oriented and renewable energy supply. The core business comprises three areas of expertise: Engineering and consulting, project development and system integration. With 90 employees consisting of leading experts in the battery industry and many years of experience in various fields of expertise, TRICERA energy is a qualified partner when it comes to the energy transition. To date, TRICERA has installed 211 megawatt-hours of capacity and 126 megawatts of power.
